## Features & Benefits

- The latest sheers, light filtering, solar screen and room darkening fabrics; select fabrics are NFPA 701 and GREENGUARD certified.
- Safer lift systems, including our PrecisionLift™ Cordless— certified WCMA Best for Kids™
  - PrecisionLift™: also known as our new cordless roller shade. To lower, gently pull the shade by the handle to the desired location. To raise, simply push the hem bar to the desired location. No additional pulling or tugging is required.
  - Tension adjustment dial allows you to fine tune when necessary
- Choose from a wide array top treatment options to cover the fabric roll, including curved and square fascia, fabric valance or deluxe wooden valance.
- Optional innovative Light Guard mounts to the window and helps achieve maximum light block effect even on the top and sides.
- Hem bar options
  - Plain Hem Bar: Clean, sleek and sturdy; perfectly weighted to provide seamless function.
  - Fabric-wrapped Hem Bar: The matching fabric wrap provides a more uniform look throughout the shade

### Lift Systems & Applications

- PrecisionLift™ Cordless
- Continuous Cord Loop
- SmartRelease™ Cord Loop
- Motorized
- *Applications:* Side by Side, Dual Shades, & Coupled Shades

### Installation Methods:

### Window and Door Applications

⬇️ \*This fabric color will be phased-out

All Solar Screens are NFPA 701 compliant (Flame Resistant) & GREENGUARD Certified

UV Ray/Light blockage is the inverse of the Solar openness factor.  
ie (5 %) blocks 95% UV rays and light

## Fabric List & Information

### Max Fabric Width

- *Max Width* is considered the max available before railroading, and/or before additional lift system limitations. It is not the max order shade width. [See Size Considerations.](#)
- The size range is provided for fabrics available to railroad, under *Max Width column*. All other fabric are not available to railroad.

### Color Coordination:

Each fabric has a set of pre-coordinated default hardware colors. If you wish to override these default colors, please specify in your order selection. Components that available to override color coordination include:

	Stainless Steel	White	Ivory	Black	Silver	Nature	Terra	Sahara	Chocolate
Chain	✓	✓	✓	✓	N/A				
Square Facia (Plain) /Curved Fascia (Plain)	N/A	✓	✓	✓					
Hem Bar (Plain)		✓	✓	✓					
Curved Fascia with Fabric End Caps		✓	✓	✓	✓	✓	✓	✓	✓
Fabric-Wrapped Hem Bar End Caps		✓	✓	✓	✓	✓	✓	✓	✓

1. Only End Caps on fabric-wrapped components are available in the 8 colors above.
2. All other components will coordinate between *White, Ivory, and Black* only.
3. *Miscellaneous Components* such as Raceway, Tension Dial, shade bracket, the back of a fabric-wrapped hem bar and other parts have defaulted color coordination between *White, Ivory, and Black*, based on the selected fabric. Not available for color override.
4. Dual shades: Dual brackets and bracket covers will match with the front shade color coordination. Other components such as clutch, end plug, bead chain, and hem bar will match with the fabric selected for that shade.

### Discontinued Fabrics:

The following fabrics are **no longer available**.  
Please remove from samples immediately.

#### Room Darkening

- **F0456 Mustard** in Loft AA0310
- **F0455 White** in Loft AA0310
- **F0833 Gray** in Bermuda AB0612
- **F0847 Raspberry** in Glamour AB0626
- **F0849 Snow White** in Cambria AB0625
- **F0653 Brilliant White** in Jewel AA0314
- **F0457 Graphite** in Loft AA0310
- **F0458 Blue** in Loft AA0310
- **F0459 Linen** in Loft AA0310
- **F0843 Willow** in Glamour AB0626
- **F0817 Snow** in Luxe AB0610

#### LF Designer

- **F0756 Toffee** in Emery AB0604
- **F0757 Onyx** in Emery AB0604
- **F0880 Mocha** in Francis AB0615

#### LF Sheer & Natural

- **F0666 Natural** in Bali A90105
- **F0667 Tan** in Bali A90105
- **F0658 Sheer Foliage** in Sheer AB0610
- **F0658 Cocoa** in Phuket A90103

#### Solar Screen (Commercial/PVC)

- **F0449 Charcoal** in W120 (12%) AB0436

### \*\*Fabric Phase-out:

The following fabrics are **currently available** but are in the process of being phased out.

#### Room Darkening

- **F0652 Sugar Peach** in Jewel AA0314

#### LF Sheer & Natural

- **F0903 Garden** in Sheer AB0621
- **F0855 Redwood** in Sumatra AB0605

#### Solar Screen (Commercial/PVC)

- **F0448 Chestnut** in W120 (12%) AB0436

## Fabric List & Information

### Railroading

Fabrics can be turned 90° space clockwise (width for height) to accommodate wider windows. Railroaded fabrics may curl along the edge. This is considered normal and is not a product defect. Railroaded fabrics may be required a few inches smaller than the fabric width and height due to factors, such as standard fabric deductions, allowances for fabric to be attached to the roller tube, etc. For fabrics with distinct patterns, if certain shades require railroading, it is optional to railroad shades on the same order for a consistent look.

### Opacity and Light Control

Fabric Opacity	Description	Privacy Level
Sheer	Provides an atmospheric touch with significant view-through while softening the outside view. Objects in the room can be seen clearly through sheer shades.	Minimal
Light Filtering	Offers a wide range of light diffusion from bright to dim. Shapes or outlines may be seen through these shades but details are not visible.	Medium
Room Darkening	Blocks a significant amount of incoming light and provides maximum privacy. A perfect choice for rooms where blackout and privacy control is a must.	High

### Fabric Disclaimers

Due to the nature of the weaving process, some imperfections in the weave is considered normal. Fabric appearance can vary based on the indoor light intensity. Railroaded fabrics may curl along the edge. This is not a defect and is considered normal. Due to variations in fabric and dye lots, colors or sheens may vary slightly. It is recommended that all shades for the same room be ordered at the same time to help ensure color consistency.

**Natural shades** may have variations and visual inconsistencies in color, grain and texture. They may also crack or split, twist or bow, shrink or stretch, and change color over time due to aging, texture, direct exposure to sunlight, or other climatic conditions. These unique characteristics are inherent in natural materials and are not considered defects in material or workmanship. Exact color matches cannot be guaranteed.

#### Linen Fabrics

Maui and Breeze collections contain linen components. The natural, inherent characteristics of linen may lead to color variation when shades are ordered at different times.

**Solar Screen** Openness factor refers to approximately how tight the weave is. Solar screen fabrics have different textures and patterns, and the angle of the yarns can affect the passage of the light. A low openness factor means the fabric is more tightly woven and that there will be less visibility through the shade with a higher degree of light control. A high openness factor provides better view-through with a lesser degree of light control. It is within industry standard that solar screen fabrics have a minimum tolerance level of +/- 10% in openness factor. As a result, openness cannot be used to determine visibility, glare and thermal control.

During the shipping process, the material may shift slightly due to its woven construction, causing slight shortening or uneven edges. There may also be slight creases in fabric. To remove creases, immediately unroll the shade completely, extend, and let it hang for several days.

## Lift Systems - PrecisionLift™ Cordless

6	Hem Bar	
7	Tension Adjustment Dial	

**PrecisionLift™** also known as **Cordless**, is our newest lift system available for roller shades.

Featuring exclusive one-touch lift technology for quick, accurate, and nimble control. To lower, gently pull the shade by lifting the handle to the desired position. To raise, just push the Hem Bar to the desired location. No additional pulling or tugging is required.

If the shade does not stay at the desired location, it can be fine-tuned with the tension adjustment dial.

**Notes:**

- Raceway is optional for cordless when ordered without top treatment. Raceway is default when ordered with a top treatment.
- Cordless is not available for Coupled Shades.
- One pole will be provided per cordless shade order. Additional poles can be requested.

**Important Disclaimers & Tips:**

**Aligned hem bar level:** For side by side PrecisionLift™ Cordless shades, the amount of hem bar exposed when the shade is raised all the way to the top may vary, depending on speed when lifting the shade and other factors. Therefore, we can't guarantee the hem bars are lined up perfectly when shades are raised to the top.

**Telescoping:** To prevent telescoping, first ensure the shade is installed in a level manner; using shims if necessary. Additionally, the handle must be placed in the center of the hem bar. (Refer to diagrams below.) If telescoping occurs, lower the shade completely and slowly raise it applying even pressure to correct the alignment.

## Lift Systems – Continuous Cord Loop (Manual Clutch)

For Continuous Cord Loop, the Raceway is only optional when there is no top treatment. When any type of top treatment is selected, raceway will be included by default.

No.	Description	Remarks
1	Shade Bracket	For inside mount end plug side

Lift Systems – SmartRelease™ (Includes Raceway)

This exclusive, and patent-pending innovation to cord loop systems allows the shade to be released or lowered from an upward position with a gentle pull.

- Raceway is provided for SmartRelease™, whether or not there is a top treatment.

Motorization

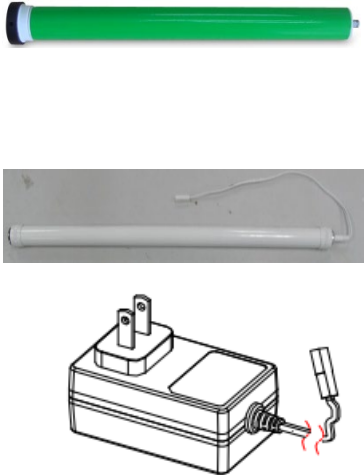

No.	Description
1	Bracket Cover
2	Shade Bracket
3	End Plug
4	Motor
5	Battery Wand (optional)
6	AC Adaptor (optional)
7	Remote Control

The Pro-Lift™ comes battery & AC powered motors; controlled by a 15-channel remote which operates multiple shades individually, or simultaneously. Each shade must be assigned its own channel.

## Lift Systems – Applications

### Dual Shades

- Like two shades in one, Dual Shades feature one shade behind another- allowing for ultimate light and privacy control
- Available in all Lift Systems
- Each shade is controlled independently and can be assigned its own lift system
  - Front shade - reverse roll, rear shade -standard roll
  - Control location: front shade - right, rear shade - left
- Available with No Top Treatment or 7" Fabric Valance
- The raceway is an integral part of the dual shade design and will be provided.

#### Notes:

1. The minimum (width & height) is based on the larger of the two minimums
2. 1 3/4" tube will always be used for dual shades with mixed lift systems

### Coupled Shades

- Great for side by side windows with small gaps
- Coupled shades allow two shades to be operated together by one control
- Available Lift Systems: **Continuous Cord Loop, & Motorized**
- Not available with:
  - SmartRelease™
  - PrecisionLift™ Cordless
  - Raceway or Top Treatments

Note: Supplied spacer blocks must be installed to compensate for height difference

### Side by Side Shades

Side by Side for roller shades will match tube size, clutch size, fascia size and bracket size by upgrading to the larger size within the shades selected. This is ideal when a uniform look for shades of different sizes within a room is requested. Available when ordered at the same time and the following criteria are identical in:

- Room
- Mount type
- Fabric color
- Lift system
- Top treatment type
- Application type (i.e. cannot match a Dual Shade with a Coupled Shade)

\*Matching Side by Side shades cannot be guaranteed if the order is for the same room but not identical in the other criteria listed above. To request Side by Side shades according to these order details, please make a note in Special Instructions.

## Top Treatments: Fascia &amp; Valance Options

Options	Available Colors	Sizes	Notes
 <p>Curved Fascia</p>	<b>Plain:</b> White, Ivory, and Black  <b>With fabric insert:</b> <b>Fabric:</b> Defaulted to the selected shade fabric. <b>End Cap:</b> White, Ivory, Natural, Terra, Sahara, Chocolate, Silver, and Black	3 ½" or 4 ½" *	For Curved Fascia with fabric insert, the max width is subject to fabric max width and the availability of railroading.  <i>*Fascia size will vary based on shade size, see chart. Matching sizes can be specified.</i>  Material: Metal
 <p>Square Fascia</p>	White, Ivory, and Black	3 ½" or 4 ½" *	<i>*Fascia size will vary based on shade size. Matching sizes can be specified.</i>  Material: Metal
 <p>Fabric Valance</p>	The default fabric on this valance will be the selected shade fabric.  <i>*For Dual shades, desired fabric should be manually selected.</i>	- 4 ½" - 7"	Max width is subject to fabric max width and the availability of railroading  When valance width exceeds (max fabric width – 5") the valance will need to be railroaded. (For select fabrics only)  Valance returns available for semi IB & OB
 <p>Crown Valance</p>	<b>Paint:</b> 001 Pure White, 013 Bisque, 049 Stone Gray, 053 Clay  <b>Stain:</b> 110 Limed White, 212 Dark Teak, 109 Weathered Teak, 237 Wenge, 221 Black Walnut, 246 Matte Black	4 ½"	Valance returns available for semi IB & OB; for full OB  Material: Wood
 <p>Modern Valance</p>	<b>Paint:</b> 001 Pure White, 012 Crisp Linen, 049 Stone Gray, 053 Clay  <b>Stain:</b> 110 Limed White, 212 Dark Teak, 109 Weathered Teak, 237 Wenge, 221 Black Walnut, 246 Matte Black	4 ½"	Valance returns available for semi IB & OB  Material: Wood

\*Note: Top treatments are not recommended for door applications.

## Common Top Treatment

- Available for all top treatments types
- Available for all lift systems, except Coupled Shades
- One Common Valance can share up to 4 shades
- All splicing rules apply to oversized Common Top Treatments.
- The minimum fabric gap between shades vary by lift system. Refer to the [Deductions](#) section for more info.
- There is no additional bracket gap between two shades:
  - Additional Requested Gap: 0"—12"

## Top Treatments: Fascia & Valance Options

### Splicing Top Treatments

Top treatments wider than its maximum limitations will be spliced. A **top treatment joinery** method is required to provide support on all spliced top treatments. This applies to single valances, and all common top treatments.

- **Single fascias will not be split.**
- **For all oversized single and common valances, valance connectors will be provided, or keystones can be selected as an option.**
- **For all oversized common facias, keystones will be provided.**

Top Treatment Joinery (Valance Connectors & Keystones)					
Type	Top Treatment	Max Length	Default Splice Location	Default Valance Joinery	Optional Valance Joinery
Single	Curved Fascia	<ul style="list-style-type: none"> <li>• Shade Width (X)</li> <li>• Custom: X + 12"</li> </ul>	NO SPLICE	N/A—No Splice	Keystones <ul style="list-style-type: none"> <li>• Up to 3 qty</li> <li>• Custom split location</li> </ul>
	Square Fascia

## Fascia Size Chart

System	Width (X)	Height (Y)	Fascia Size
PrecisionLift™ Cordless	All sizes		3 ½"
Continuous Cord Loop/Motorized	X ≤ 96"	Y ≤ 96"	3 ½"
		Y > 96"	4 ½"
	X > 96"	Y ≤ 72"	3 ½"
		Y > 72"	4 ½"
SmartRelease™	X ≤ 96"	Y ≤ 96"	3 ½"
		Y > 96"	4 ½"
	X > 96"	All heights	4 ½"

Note: Fascia sizes will not be automatically matched for entire orders. "Side by Side" needs to be selected or specified in special instructions while placing the order to avoid any matching issues.

## Return Size Options

Valance	Inside Mount	Outside Mount
4 1/2" Fabric	1", 1 1/8", 1 1/4", 1 3/8", 1 ½" (Custom sizes: 1 5/8" - 4 1/2")	Default
7" Fabric		
4 1/2" Crown Wood	1/2", 5/8", 3/4", 7/8", 1", 1 1/8", 1 1/4", 1 3/8", 1 ½" (Custom sizes: 1 5/8" - 4 1/2")	Custom sizes longer than standard: (1/8", 1/4", 3/8", 1/2", 5/8", 3/4", 7/8", 1")
4/12" Modern Wood		

## Additional Options

### Fabric Roll

- Standard Roll: Fabric rolls down against the window glass.
- Reverse Roll: Fabric rolls down away from the window glass.
  - Reverse roll is default for dual shades.
  - Not available with Square Fascia or Curved Fascia.

**Standard Roll**

**Reverse Roll**

### Poles for PrecisionLift™ Cordless Shades

One complimentary 30" Fiberglass pole is included in every cordless roller shade order. Additional poles and pole attachments can be added to your order as an option, (max of 2 poles or 2 pole attachments per shade).

- Additional 30" Fiberglass Pole

**30" Fiberglass Pole**

- Cordless Operating Pole
  - Color: Black
  - Length: 36" & 60"
  - Fixed head

**Pole**

- Pole Attachment
  - Color: Black
  - No pole included, attachment only
  - Screw-on design; compatible with most screw tip poles
  - NOT compatible as a replacement piece for the Cordless Pole

**Pole Attachment**

## Additional Options

### Chain for Continuous Cord Loop & SmartRelease™ Shades

#### Chain Options:

- Standard: Plastic - Available in White, Ivory, Black
- Upgrade: Stainless Steel

#### Chain Length

	Order Height	Chain Length (For SmartRelease™)		Chain Length (For Continuous Cord Loop)
		Plastic Chain	Stainless Steel Chain	
<b>Default</b>	12" ≤ Y ≤ 30"	16"	16"	(2/3)Shade Height + 6"
	30" < Y ≤ 42"	24"	24"	
	42" < Y ≤ 54"	36"	36"	
	54" < Y ≤ 66"	48"	48"	
	66" < Y ≤ 90"	60"	60"	
	90" < Y ≤ 144"	84"	84"	
<b>Optional</b>	All shade heights	Optional Lengths: 16", 24", 36", 48", 60", 84"	Custom Length must be longer than 12".	Plastic/Stainless Steel: custom length must be longer than the default.

#### Notes:

- Chain width is measured from the top of the brackets/installation bracket (raceway) to the bottom of the tension device.
- The tolerance for chain width of SmartRelease™ would be 0~1.18".

### Hem Bar

- Default: Plain hem bar
  - Available in White, Ivory, and Black
- Optional: Fabric-wrapped hem bar
  - Front: Wrapped with the selected shade fabric
  - Back: Will not be fabric-wrapped. Back hem bar color will provide in the default color and is not available for color coordination override. See color coordination chart.
  - End caps: Available in White, Ivory, Natural, Terra, Sahara, Chocolate, Silver, and Black

Plain Hem Bar

Back of the hem bar is not fabric-wrapped. Default color will be provided.

Choose an End Cap Color or keep the default.

Fabric-wrapped Hem Bar

## Additional Options

### Hold Downs

Choose from Traditional or Magnetic hold-down brackets (one for the left and the right side of shade) to secure the shade in place when closed.

- **Traditional Hold Down**

- Optional for window applications

- **Magnetic Hold-Down**

- Defaulted for door applications.
  - Magnetic hold-downs are required for door applications to help keep the shade in place.
  - Not recommended for metal door applications.
- Optional for window applications.

**Magnet**

**Magnet Catch**

- The magnet will be pre-installed at the factory on the hem bar.
- The magnet catch, which needs to be installed at the job site, can be found in the hardware box.

#### Available colors for Magnet Catch

- (Default) Nickel-Plated
- (Optional) Pure White, Silk White, Bisque, Pearl, Bright Brass, Antique Brass, Black, Crisp Linen, String, Sea Mist, Stone Gray, Brown Gray, Taupe Gray

Allow extra wall space for installation:

- 1 7/16" in width, from the side edge of the shade
- 5/16" in width, from the bottom edge of the shade or window sill

### Shim (Spacer Block)

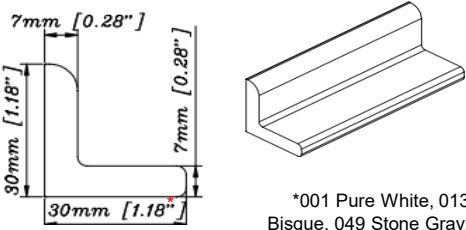

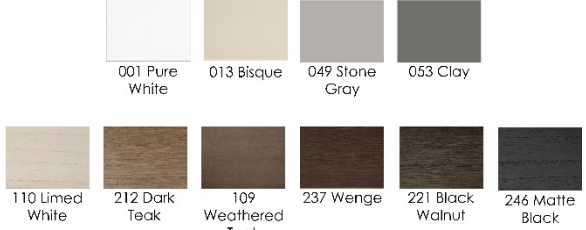

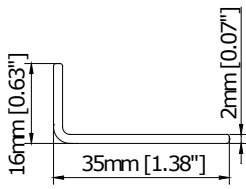

- Dimensions: 41mm (1.614") x 10mm (0.394")
- Up to 3 Spacer Blocks can be stacked per bracket
- Optional

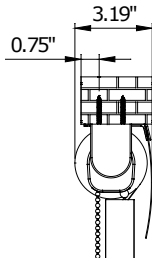

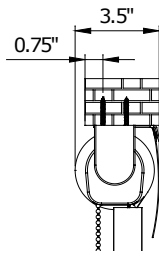

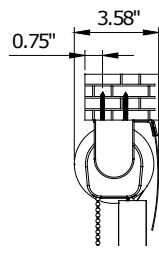

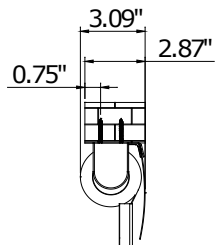

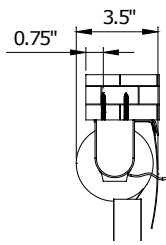

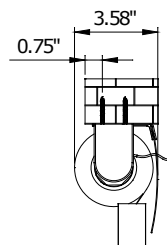

## Additional Options

### Light Guard

- Light Guard is specifically designed to block incoming light escaping off the top and sides of the window opening
- The application consists of two side light guards (Wood or PVC), & a top light guard

	Dimensions	Available colors
<b>Wood Light Guard</b>  <b>(Side)</b>	 <p>*001 Pure White, 013 Bisque, 049 Stone Gray, size is 1.18" x 1.37"</p>	
<b>PVC Light Guard</b>  <b>(Side)</b>		 <p><i>In the order shown above: 2052 Day Light, 2021 Cloud Cream, 2583 Warm Sand, 2480 Chocolate, 2129 Silver, 2208 Black</i></p>
<b>Top Light Guard</b>	4 ½"	Standard color: White Stucco Made of PVC
<b>Dual Shades Top Light Guard</b>	7 ½"	Used for Dual Shades only  Color will vary: <ul style="list-style-type: none"> <li>Top Light Guard piece will match the RD fabric (or rear shade if both are RD fabrics)</li> <li><b>F0822 Pure White in Fiji</b> will be provided as the light blocking piece when there are no RD fabrics.</li> </ul>

### Minimum Mounting Depth Requirements for Roller Shades with Light Guard

	1 1/8" tube	1 3/4" tube	2" tube
<b>Continuous Cord Loop</b>			
<b>Cordles/ Motorized</b>	<b>Cordless 1 3/4" tube</b> 	<b>Motorized 25 CE/25 TE, 1 3/4" tube</b> 	<b>Motorized 35E, 2" tube</b> 

Size Considerations

	Single Shade			Dual Shade			Coupled Shade		
	Clutch	Cordless**	Motorized	Clutch	Cordless**	Motorized	Clutch	Cordless	Motorized
Min Width	8" (12" for Smart-Release™)	18"	14"	8" (12" for Smart-Release™)	18"	14"	24"	NA	26"
Max Width	118"	96"	118"	96"	96"	96"	236"	NA	236"
Min Height	12"	12"	12"	12"	12"	12"	12"	NA	12"
Max Height	144"	96"	144"	96"	96"	96"	144"	NA	144"

- **This table is for reference only.** There may be exceptions due to different fabric weight. For details by the fabric, refer to the appendix.
- For select fabrics that can be railroaded, after the fabric has been railroaded, the max shade height is approximately the original fabric width – 12".
- \*\*PrecisionLift™ Cordless shades have additional size restrictions. Please refer to the rules below

Cordless Size Limitations	
Width (X)	Height (Y)
18"≤X≤19"	Y≤48"
19"<X≤24"	Y≤72"
24"<X≤96"	Y≤96"

## Deductions

### Inside Mount:

Shade width = Order width - 1/8" (**Top Mount**)

Shade width = Order width (**Side Mount**)

Shade height = Order height (**Top & Side Mount**)

### Outside Mount:

*No Deductions—*

Shade width = Order width

Shade height = Order height

Recommendation: To avoid light leakage, add at least 4" to the width, and 2" to the height.

### Deductions for Roller Shades with a Common Valance:

(IM)

Left shade width = left shade order width - 1/8"

Center shade width = center shade order width - 1/8"

Right shade width = right shade order width - 1/8"

(OM)

Left shade width = left shade order width

Center shade width = center shade order width

Right shade width = right shade order width

### Roller Shades Installed on a Door

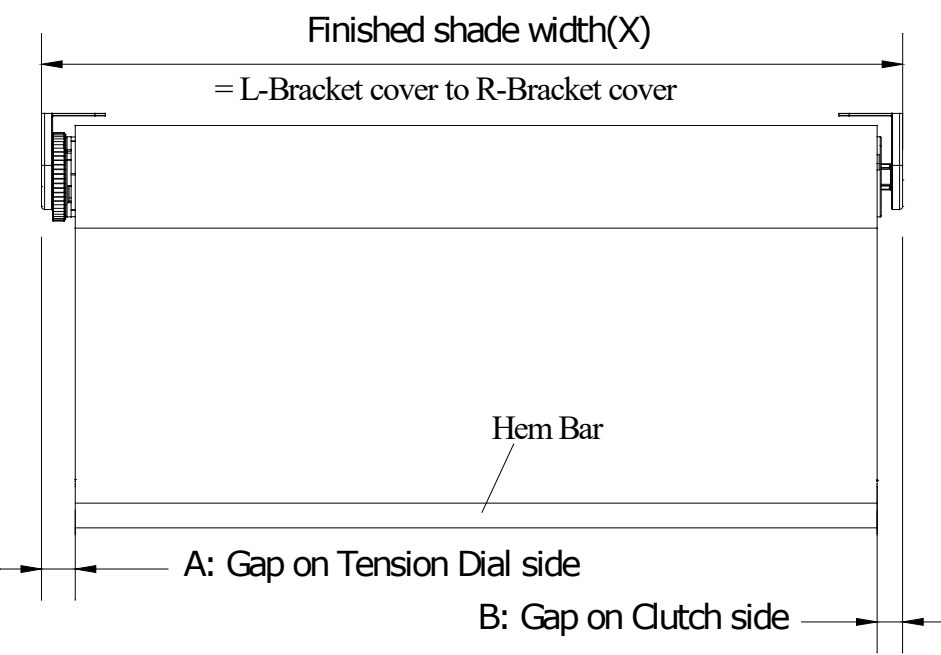

To receive shades suited for door applications, please select the option during order entry. When selected,

- Shades will have an additional fabric deduction of approximately 1/16" (2mm) on each side in order to prevent the fabric from fraying.  
(See fabric deductions by lift system for total fabric width deductions.)
- Magnetic hold-downs are defaulted and required when installed on a door.
- Top Treatments are available but not recommended for door applications.

Deductions

Fabric Deductions and Finished Fabric Widths by Lift System

Single PrecisionLift™ Cordless - Inside Mount				
Shade Width	Shade Height	Tube Size	Shade Type	Fabric Width
18" to 96"	12" to 96"	1 3/4"	Cordless without top treatment	Fabric Width = Order Width - 1 3/16"
			Cordless with Fascia	Fabric Width = Order Width - 1 5/16"
			Cordless with Valance	Fabric Width = Order Width - 1 1/8"

Shade type	Gap A	Gap B

without top treatment	9/16"	9/16"
with Fabric Valance	1/2"	1/2"

## Deductions

## Deductions / Finished Widths by Top Treatment

Inside Mount	
Top Treatment	Finished Width
Fascia	Shade width = order width - 1/8"      Fascia width = shade width - 1/8" Common valance width = left/center/right total shade order width + gaps between shades - 1/8" - 1/8"
Wood/Fabric Valance	Shade width = order width - 1/8"      Valance width = shade width Common valance width = left/center/right total shade order width + gaps between shades - 1/8"

Semi-Inside Mount	
Top Treatment	Finished Width
Fascia	Shade width = order width - 1/8"      Fascia width = shade width - 1/8" Common valance width = left/center/right total shade order width + gaps between shades - 1/8" - 1/8"
Fabric valance	Shade width = order width - 1/8"      Valance inner width = shade width + 3/8"      Valance outer width = Valance inner width + 1 1/16" Common valance inner width = left/center/right total shade order width + gaps between shades - 1/8" + 3/8"
Wood Valance	Shade width = order width - 1/8"      Valance inner width = shade width + 3/8" Common valance inner width = left/center/right total shade order width + gaps between shades - 1/8" + 3/8" For Wood Modern Valance: Valance outer width = valance inner width + 7/8" For Wood Crown Valance: Valance outer width = valance inner width + 1 1/4"

Outside Mount	
Top Treatment	Finished Width
Fascia	Shade width = order width      Fascia width = shade width - 1/8" Common valance width = left/center/right total shade order width + gaps between shades - 1/8"
Fabric valance	Shade width = order width      Valance inner width = shade width + 3/8"      Valance outer width = Valance inner width + 1 1/16" Common valance inner width = left/center/right total shade order width + gaps between shades + 3/8"
Wood Valance	Shade width = order width      Valance inner width = shade width + 3/8" For Wood Modern Valance: Valance outer width = valance inner width + 7/8" For Wood Crown Valance: Valance outer width = valance inner width + 1 1/4" Common valance inner width = left/center/right total shade order width + gaps between shades + 3/8"

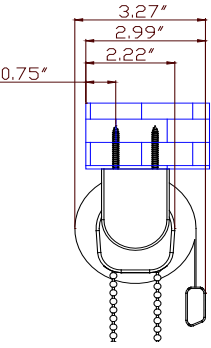

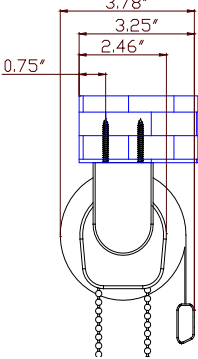

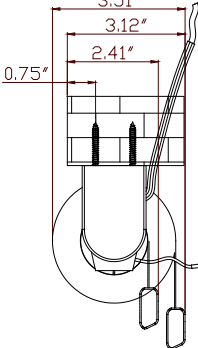

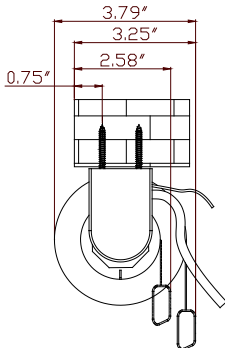

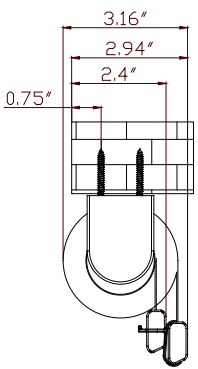

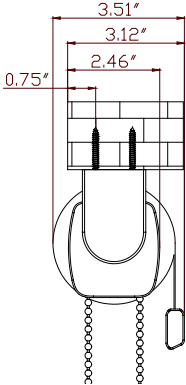

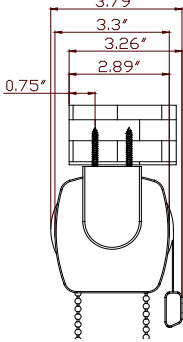

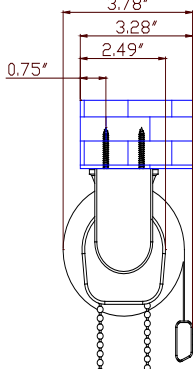

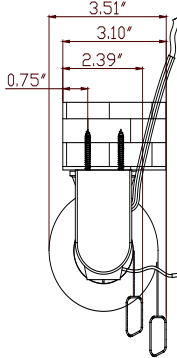

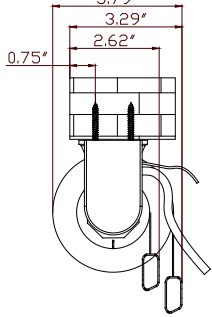

## Custom Top Treatment Width

- When requesting a custom width top treatment, please specify based on inner width for valances, or with end caps for fascias. Max width: X+12"

## Bracket Dimensions

### Inside Mount (Top Mount Brackets)

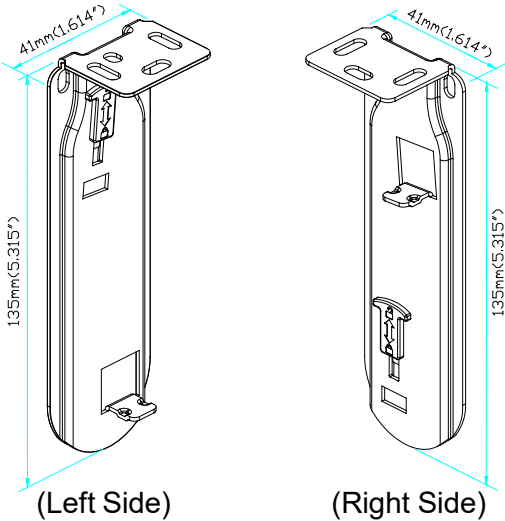

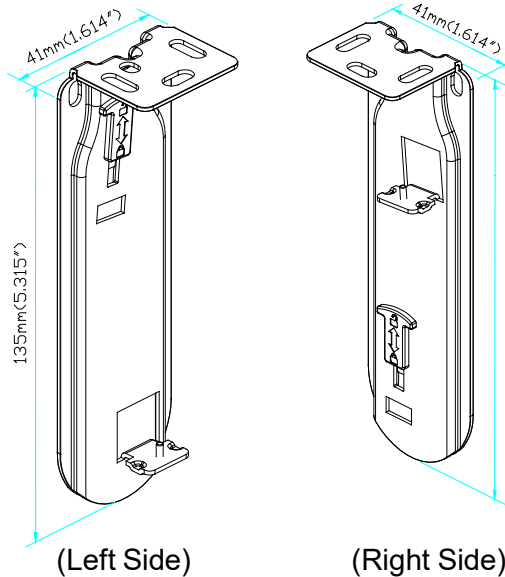

- For Manual Clutch, the clutch side & end plug side will be determined by the control location. For all other lift systems, both brackets are universal for the left or right side.

Item	Bracket	Picture	Description
1 & 2	<b>Small Mounting Brackets</b>	  <p>(Clutch Side) (End Plug Side)</p>	<p>Used for:</p> <ul style="list-style-type: none"> <li>Inside Mount</li> <li>1 1/8" Clutch</li> <li>Motorized</li> </ul>

## Hardware Information

Different hardware will be provided for different control systems. The quantity of some hardware will depend on the shade width. See below for more information.

### Mounting Bracket (OM with raceway):

Shade width X	Qty
$8" \leq X \leq 40"$	2 End Mounting Brackets
$40" < X \leq 80"$	2 End Mounting Brackets + 1 Middle Installation Brackets
$X > 80"$	2 End Mounting Brackets + 2 Middle Installation Brackets

Note: IM brackets will come automatically screwed onto raceway

### Mounting hardware for top light guard piece (with light guard):

Shade width X	Qty
$X \leq 40"$	2
$40" < X \leq 68"$	3
$68" < X \leq 96"$	4
$X > 96"$	5

### Valance Bracket for Wood/Fabric Valance:

#### Single Shade

Shade Width X	Qty
$X \leq 40"$	2
$40" < X \leq 68"$	3
$68" < X \leq 96"$	4

#### Dual Shade

Shade Width X	Qty
$X \leq 33"$	2
$33" < X \leq 54"$	3
$54" < X \leq 75"$	4
$75" < X$	5

\* For common valance or valance in custom width, the qty of valance bracket =  $(\text{Outer width of each piece} - 12") / 28 + 1$

### Valance Bracket for Square/Curved Fascia:

Shade Width X	Qty
$X \leq 40"$	2
$40" < X \leq 68"$	3
$68" < X \leq 96"$	4
$96" < X \leq 124"$	5
$X > 124"$	6

\* For fascia in custom width, the qty of valance bracket =  $(\text{Custom width} - 12") / 28 + 1$

## Cleaning Roller Shades

---

Routine cleaning will help maintain the beauty of your shade.

Proper ways to clean Roller Shades:

- Use a hand held vacuum to remove debris
- Use a duster to remove any light dust
- Spot clean by using a soft cloth or sponge moistened with lukewarm water. Add mild detergent, if needed. Blot gently to avoid creasing or damaging the fabric. Rubbing can damage the fabric.

Do not iron roller shade fabrics.
